Dear Robert,

I know the holidays are coming up and that is a very busy time all around, but thought you might like some "quiet work" to fill in sometimes, so here are some of the new numbers I've been working on. At this point there are probably too many numbers, but did want to tie in where some lines crossed, plus that last info brought forward several more lines. So most all of the Jaudons are numbered and some others, and we can take out later those where we don't have further descendants. And if we get the numbers straight before we meet again, should clear up some confusion. Hopefully this list will make it easier to change.

I've been trying to track some of the Taylors, Berrys, Flinns, Williams other daughterstx, hoping for information on Susan, but no luck so far.
